Two Official Resources...

#1: Google Quality Rater Guidelines

#2: Google Webmasters Resources

Google Quality Raters Guidelines

= Is your content good?

The Google Quality Raters Guidelines

- 160 pages describing “good” content vs. “bad” content
- Used by Quality Raters, who help Google review algorithm updates

Google's Rating Criteria

Raters are instructed to understand your content using three main criteria:

- Content Purpose
- Page Quality and Content “Amount”
- Expertise, Authoritativeness, and Trustworthiness (E-A-T)

Content Purpose

What is the user trying to accomplish?

What is their intent and the context?

How does your content relate to the user's goal?

What is my Purpose?

Understanding Intent and Context

“Urine drug test”

Understanding Intent and Context

“Urine drug test”

“Urine drug test detection times”

Understanding Intent and Context

“Urine drug test”

“Urine drug test detection times”

“How long can a urine drug test detect cannabis usage?”

Page Quality and Content “Amount”

Does your content satisfy that need?

- Main Content (MC)
- Supplementary Content (SC)
- Advertising / Monetization

Does Your Content Satisfy?

Main Content is any part of the page that directly helps the page achieve its purpose.

- Does this page match the user's intent and context?
- How well does it fulfill the user's need?

Does Your Content Satisfy?

Supplementary Content is additional content on the page.

- Does the SC help the page better achieve its purpose?
- Does it add or detract from the overall user experience?

Does Your Content Satisfy?

Advertising / Monetization is any way that the page tries to financially benefit from the user's activity.

- Is it related to the user's intent and context?
- Does the monetization help or hurt the user's experience?

Expertise, Authoritativeness, and Trustworthiness

Based on MC quality and amount, website information, and website reputation:

- How well versed are you?
- How much experience do you have?
- What is your reputation regarding the topic?
- Are you credible / legitimate?

“For some topics, the most expert sources of information are ordinary people sharing their life experiences.”

- Google Quality Raters Guidelines

Your Money or Your Life (YMYL) Pages

Content that can impact future happiness, health, or financial stability is held to a higher standard.

- Financial Transactions
- Medical or Health Related
- Legal Advice
- News

CRITICAL

Google Webmasters Resources

= How to structure your
website content

Create a high-quality website

Take these courses to improve your site's content and user experience.

Take Webmaster Academy

Take this course to learn how to create a great website with valuable content and have it findable in Google Search.

[TAKE THE COURSE](#) →

Follow Webmaster Guidelines

Follow our design, technical and quality guidelines to help Google find, index and rank your site.

Is something missing?

[Linkedin.com/in/hijavier](https://www.linkedin.com/in/hijavier)

#PRNews #SocialShakeUp

ALL THE
THINGS!

[Linkedin.com/in/hijavier](https://www.linkedin.com/in/hijavier)

#PRNews #SocialShakeUp

The Google Algorithm

“We will consider the [main content] of the page to be very high or highest quality when it is created with a high degree of time and effort, and in particular, expertise, talent, and skill.”

- Google Quality Raters Guidelines

Put Effort Into Your Content

Understand:

- Your user,
- Their needs,
- And the context.

Create Content That:

- Is for your user,
- Meets their needs,
- And is accessible.

“Even some High or Highest quality pages lack a way to navigate to the homepage.”

- Google Quality Raters Guidelines

Key Takeaways

- Google's algorithm is cryptic, but it's all about serving the users
- Google tells you what they want from your content... Don't dismiss it because it's not what you want to hear
- The technical details matter, but content quality matters much more
- Create your content with the same care & effort as your product
- Awesome content takes A LOT of work

Let's create
awesome content
for our users.
